

AMENDMENTS TO THE SPECIFICATION:

Please amend the indicated paragraphs of the specification in accordance with the amendments indicated below.

Page 1: 1st full paragraph, amend as indicated below:

The invention relates to a method for examining the ocular fundus in accordance with the features cited in the preamble to claim 1 by generating images of the ocular fundus by means of a camera and/or an illumination unit, evaluating quality of the images, comparing the images with image patterns corresponding to one or more diseases to determine, with a degree of certitude, whether the images are classifiable as indicating one or more of said diseases, and controlling position of at least one of the camera and the illumination unit optimally for further evaluating quality of the images and degree of certitude of classification of the images as indicating said one or more diseases.
